FSEU - Fire Safe Europe
57, rue Mercelis
B-1050 Bruxelles

Luxembourg, April 25th 2019

Dear Ladies, dear Sirs,

Thank you so much for your appeal regarding fire safety! Only last week, the disastrous fire of Notre-Dame in Paris has shown how topical that issue is, also in the preservation of our spiritual and cultural heritage!

Thus, our party, ADR, are absolutely convinced that you are right in drawing our attention to that issue. We can assure you that we share your concerns and are fully convinced that more efforts have to be done.

In safety matters as in many others, a careful examination has to be made regarding the determination of the most appropriate way to address the issue. What could perhaps better be done in an international framework or on an EU-level and what actions promise to be more efficient if taken nationally?

ADR remain attached to the principle of subsidiarity. We do consider that some issues might be planned and coordinated on an international level to be addressed more efficiently. Technical issues, safety norms, interoperability, tactics and equipment could be harmonized in a wider framework. In such matters, we are guided by pragmatism and the wish to see quick and reliable results.

We applaud your efforts and your dedication to this subject. Fire causes a lot of harm, personal grief and heavy damage to our environment and our economies. Let's stand together to reduce such risks!

Sincerely Yours,

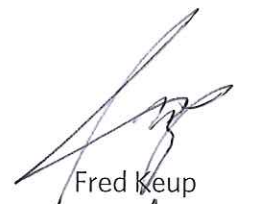

Gast Gibéryen
